### Reasons For Allowance

Claims 5 – 15 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest a segmented digital to analog converter that comprises a third segment having a third series of resistors including a third set of resistors connected end to end from along which an output can be generated at any point between the resistors wherein the third segmented series of resistors further includes one current source connected at one end of the third series of resistors and a second current source connected at another end of the third series of resistors. Also, in combination with other limitations of the claims the prior arts made of record fail to suggest a segmented digital to analog converter that comprises at least three segments that each have an individual plurality of resistors wherein each segment is connected to one set of cascaded current sources that provide current to one end of each series of resistors and is connected at another end to another set of cascaded current sources to provide current to another end of each series of resistors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2819

### Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
3. Morton (US patent Number 5,111,205) discloses a DAC and analog-to-digital converters.
